You could have one of cancer's 7 warning signals and not recognize it.

1. Unusual bleeding or discharge.
2. A lump or thickening in the breast or elsewhere.
3. A sore that does not heal.
4. Change in bowel or bladder habits.
5. Hoarseness or cough.
6. Indigestion or difficulty in swallowing.
7. Change in size or color of a wart or mole.

If one persists for two weeks, see your doctor. But better still, don't play guessing games with your life. See your doctor for a checkup once a year no matter how great you feel. Help yourself with a checkup. And others with a check.

Planetarium Yule Program Is Announced

CHATHAM — This December the Chatham Planetarium will present its annual Christmas program, "The Star of Bethlehem." The sky theatre will be used to demonstrate the various possibilities astronomers have suggested as the famous Christmas Star. The night sky of 2000 years ago will be shown just as it appeared to the Bethlehem Shepherds, and a special segment of the program will include the telling of Clement Moore's "The Night Before Christmas."

A public Christmas program is scheduled for each Tuesday at 7:30 p.m. and each Sunday at 2 p.m. until Christmas. Special showings of this program may be reserved for groups. Reservations can be made by mail or telephoning the Chatham Planetarium. Educational and Cultural Center at Chatham.

All programs are presented free of charge as a public service by the Pittsylvania County Schools.

Jack Gross, planetarium director, has announced that a new control system now being installed at the planetarium will be completed in time for use in the Christmas program. The new system updates the Chatham Planetarium and allows an operator to switch on any of the over 200 special effects projectors at any time. Gross states, "This will allow us additional flexibility especially with our school programs. If, for example, a student wants an explanation of a shooting star during the discussion period, the planetarium teacher will be able to immediately demonstrate the phenomenon."
